

Specialty Wheels For Tourist & Scenic Railways

McKees Rocks Forgings has been custom manufacturing forged steel wheels for industrial and rail applications for over 100 years. Recently, our complete forging, heat treating, and machining facility has turned its expertise to specialty wheels for tourist and scenic railways. Located near Pittsburgh, PA, our operation provides a high quality and long wearing product. At McKees Rocks Forgings, we offer:

- *No minimum required quantities*
- *The ability to supply virtually any wheel configuration needed*
- *A 10,000 ton hydraulic press for maximum forging reduction*
- *Specialized "rim toughening" heat treatment facility for all AAR wheel classes (321-363 BHN or any other hardness range)*
- *Heavy duty rough and finish machining capability*
- *100% North American steel, 100% North American facility*
- *In-house level 3 ultrasonic and magnetic particle inspection capabilities*

With over 100 years of experience and a state of the art facility, McKees Rocks Forgings will keep you on track.
